MISSION

We are an open Enterprise Architecture Management (EAM) platform and provide guidance based on an organized topic map.

This map guides you to examples from practice and to reusable study material based on a consolidated conceptual foundation.

We want to make EAM accessible to a wider audience and advance the effectiveness of EA initiatives based on contributions from the EA community.

ABOUT US

We are a group of experts from industry and academia and want to expand this group with further experts. We share experience and knowledge.

Prof. Dr. Stefan Bente
